От месец февруари 2019 г. списание „Реферативен бюлетин по оториноларингология“ е включено в Националния референтен списък на съвременни български научни издания с научно рецензиране под номер 621. В този списък се вписват издания, които прилагат предварително научно рецензиране на предложените за печат публикации и са регистрирани в Националната агенция за международни стандартни номера.

Съдържание

| | |
|---|----|
| Guidelines for Authors | 3 |
| Medially-invasive cholesteatoma Petar Rouev | 4 |
| Vestibular evoked myogenic potentials testing for diagnosing Madzharova K M.D., Beshkova A. | 8 |
| Recent advances in the epidemiology and diagnosis of some common vestibular disorders Mario Milkov | 12 |
| Extreme bradycardia during microsurgery of the larynx Tsvetomir Marinov | 18 |
| Ventilation through laryngeal mask in patient with severe laryngeal stenosis Tsvetomir Marinov | 21 |
| Intraoperative and postoperative complications during microlaryngeal surgery Marinov Ts., M. Belitova, T. Popov, N. Nizamova, J. Rangachev, D. Popova | 25 |
| Clinical aspects of satellite diseases and cricoarytenoid joint involvement. Arthritis of the cricoarytenoid joint. Clinical case. Topalova-Shishmanova A., Dzhambazov K., Konsulov Sp., Traikova N., Anesteva R., Kraeva M. | 29 |
| Laryngeal mask ventilation in patient with Treacher Collins syndrome Tsvetomir Marinov | 34 |
| Carbon dioxide transoral laser microsurgery – the gold standard for early <i>glottic laryngeal carcinomas</i>? Nezi Nizamova | 37 |
| Actinomycosis of the parotid gland. Challenges in diagnosis and treatment – case report C. Ivanova, S. Bachurska, K. Popov | 40 |
| Practical monitoring of the clinical efficacy of sinquanon in patients on antibiotic therapy Veselin Pavlov, Konstantin Borisov | 43 |
| Calendar | 46 |

Guidelines for Authors

These guidelines are in accordance with the „Uniform Requirements for Manuscripts submitted to Biomedical Journals“ published in *N Engl J Med* 1997; 336: 309-315.

The Bulgarian Journal *Steno* published original papers, editorials, short rapid communications, case reports and reviews concerned with aspects of general interest of the scientific basis, clinical features, and therapeutic approach of diseases. The journal is published quarterly and papers are accepted for publication both in English and Bulgarian languages. Manuscripts containing original material are accepted if neither the article nor any essential part of this has been or will be published or submitted elsewhere before. This restriction does not apply to abstracts or press reports published in connection with scientific meetings.

Submit an original manuscript with one set of original figures and two copies of the complete manuscript. Address all submissions to the Editor / M. Milkov, Journal Steno, street, №, Varna, Bulgaria.

The manuscripts should be on standard-sized A4 paper in double-spaced type-writing on one side of the paper only. Manuscripts must be prepared in accordance with the „Uniform Requirements for Manuscript submitted to Biomedical Journals“. Manuscripts improperly prepared will be returned to the author without review. A separate covering letter signed by the authors must state that the data have not published elsewhere and identify the author to whom the correspondence must be submitted. All original manuscripts will be submitted to reviewers, known personalities in the field.

Editors Team would like to kindly ask all authors to include (if possible) and cite in their manuscripts research on the topic of the article, done by Bulgarian authors as well.

Manuscript preparation

Arrange manuscript as follows, each component (1-9) beginning on a separate page: (1) title page, (2) abstract, (3) introduction/background, (4) material and methods, (5) results, (6) discussion, (7) references, (8) figure legends, (9) tables. Place page number and first author's last name at top of each page. Cite references, figures and tables consecutively as they appear in the text.

(1) Title page

Title should be concise and descriptive. The title page should include the name of the author with initials or distinguishing first name, and the name and address of the hospital or institution where the work was performed.

List grant support and other assistance.

List alphabetically abbreviations used and three to ten keywords.

Provide name, complete address, telephone number and fax number of corresponding author. Title page should include also a short (fewer than 45 characters) running head.

(2) Abstract

Provide on a separate page an abstract of not more than 250 words, consisting of four paragraphs, labeled: Background, Methods, Results and Conclusions. Do not use abbreviations, footnotes, or references. For original articles, if the paper is published in French, an English abstract should be added to the manuscript, and conversely.

(3) Body of paper

The paper must be conventionally structured in the following chapters: Introduction/ Background, Methods, Results, and Discussions. Each chapter must begin on separate pages. In Materials and Methods, the authors must give sufficient information to permit detailed evaluation and duplication of the work by other investigators. Ethical guidelines followed must be described.

Approval of institutional human research review committees or animal welfare committees should be cited. Outline statistical methods used. Identify drugs and chemicals used by generic name (if trademarks are mentioned, manufacturer name and city are given).

(4) References

Cite references in order of appearance in text using arabic numerals in parentheses. Cite personal communications and unpublished data directly in text without being numbered. Conform abbreviation to those used in *Index Medicus*. List of all authors when there are six or fewer; when there are seven or more, list the first three, than et al.

Examples:

Original article 23. Kimura K, Ohto M, Matsutani S, Furuse J, Hoshino K, Okuda K. Relative frequencies of portosystemic pathways and renal shunt formation through the „posterior“ gastric vein: portographic study in 460 patients. *Hepatology* 1990; 12: 725-728

Article in book:

21. Rousselot LM, Burchell AR. Splenic and arterial portography and hemodynamics in portal hypertension. In: Schiff L, ed. *Diseases of the liver*. Philadelphia: JB Lippincott, 1975: 368-423

(5) Tables

Tables must be typed and double-spaced, each on separate sheet. Number according to order of citation. Table number and title must appear above table, explanatory notes below.

(6) Figure

legends Figure legend must be typed and double-spaced. Numbered according to order of citation. Provide enough information to permit the interpretation of figure without reference to text.

(7) Figures/Illustrations

Figures should be professionally designed. Submit one set of high-quality glossy photographs in a separate envelope. They will be submitted in actual-size, as they will be printed without enlargement or reduction. Identify each figure with first's author's last name, figure number in Arabic numerals and an arrow indicating the top on the backside on each figure marked with a soft pencil or on a self-adhesive label affixed to the back of each figure. Color illustrations are accepted if they make an exceptional contribution. Authors will be required to subsidize the publication, if have colored figures at a cost of ? BNL per figure.

Case reports will only be accepted if of major merit and interest. Letters related with articles published in *Steno* or with topics of general interest are welcomed.

Images in Clinical Medicine will publish the most interesting images in the field of clinical medicine addressed to the Editor. Cor-

rections other than printer errors may be charged to the author.

Plagiarism

International bulletin of Otorhinolaryngology is extremely sensitive about plagiarism. All submissions are screened by a similarity detection software (iThenticate by Cross-Check) at any point during the peer-review and/or production process. Even if you are the author of the phrases or sentences, the text should not have unacceptable similarity with the previously published data.

When you are discussing others' (or your own) previous work, please make sure that you cite the material correctly in every instance.

In the event of alleged or suspected research misconduct, e.g., plagiarism, citation manipulation, and data falsification/fabrication, the Editorial Board will follow and act following COPE guidelines.

Peer-review procedure

The *Steno* promotes evaluation of all the original papers by two or three independent (?) reviewers. The peer-review process is essential for ensuring the quality of the scientific information disseminated. The reviewers are asked to evaluate the manuscript by applying the same standards as for the international journals. The reviewers send their comments to the Editor. The Editor will inform the authors about the suggestions made by the referee and ask them to answer the questions and make the required corrections. The revised manuscript should be sent in no more than two months to the Editor. Revised manuscripts sent later will not be considered. When the Editor receives the corrected version with all changes marked, accompanied by a letter with a point-by-point reply to the reviewers' comments, he sends those back to the same reviewer, who makes the final recommendation for acceptance or rejection of the manuscript.

Declaration of interest

International bulletin of Otorhinolaryngology requires and encourages the authors and the individuals involved in the evaluation process of submitted manuscripts to disclose any existing or potential conflicts of interests, including financial, consultant, and institutional, that might lead to potential bias or a conflict of interest. Any financial grants or other support received for a submitted study from individuals or institutions should be disclosed to the Editorial Board. To disclose a potential conflict of interest, the ICMJE Potential Conflict of Interest Disclosure Form should be filled in and submitted by all contributing authors. The journal's Editorial Board resolves cases of a potential conflict of interest of the editors, authors, or reviewers within the scope of COPE and ICMJE guidelines.

The Editorial Board of the journal handles all appeal and complaint cases within the scope of COPE guidelines. In such cases, authors should get in direct contact with the editorial office regarding their appeals and complaints. When needed, an ombudsman may be assigned to resolve claims that cannot be resolved internally. The Editor in Chief is the final authority in the decision-making process for all appeals and complaints.

The Editorial Team *Steno*
